FootfallCam 3D Pro2™ is specially designed to support low ceiling height (as low as 2.1m) counting. Embedded with a powerful 1.2GHz Quadcore processor, it is packed with feature upgrades while maintaining performances of its predecessors. Specifically designed to run complex video processing algorithms, the GPU runs our AI-based algorithms which utilises depth, colour and texture pattern to identify a person, producing superior accuracy compared to using colour pattern alone. The built-in sensor further improves accuracy in low-light, indoors and high noise environments. Delivered in aluminium casing for heat dissipation, the overall form factor is more compact and inconspicuous than ever.

Basic Functions

1. **Video Counting.** Counting ins and outs (measure store performance, data collection for analysis of store performance, measure marketing response).
2. **Wi-Fi Counting.** Basic Wi-Fi counting metrics are available e.g. outside traffic, visit duration, returning rate and traffic flow profiling.
3. **Staff Exclusion.** Staff are excluded from counting just by clipping the Staff Exclusion Tag on the shirt with no infrared or any emission involved.

Advanced Functions

1. **Real-time Occupancy Tracking.** Track the number of visitors in a building at any given time along with a smart display with a live occupancy update. Alert staff when the occupancy limit is breached.
2. **GPIO Functionality.** Integrate occupancy counting with all entrances and exits. If the occupancy level is reached, it will automatically close the door to prevent more customers from coming in.
